

TECHNICAL DATA SHEET

Mould Defender

PROTITE Mould Defender is a powerful long lasting mould inhibitor which can be added to paint, timber oils/stains, textured coatings, grout, mortar and adhesives, preventing the unsightly growth of mould onto the surface it is applied to. Mould Defender forms an enduring film that will not change the look or feel of the substrate to which it is applied. Mould Defender is added to the finish prior to applying, it is not to be applied to affected areas on its own.

Benefits: Protects surfaces against mould growth.

Sizes: 20mL, 50mL, 75mL

Uses:

Mould Defender is recommended to be used in areas where high moisture is present e.g. Bathroom, Laundries and Kitchens, however for peace of mind can be used throughout the whole house. Mould Defender can be added to a wide range of products including paint (water based and solvent), timber oils/stains, textured coatings, grout, mortar and adhesive.

- **Water based and solvent based paints, oils and stains:** Add 5mL per L of paint/stain/oil.
- **Mortar, Grout, Textured Coatings, Fillers and Adhesives:** Add 5mL per kg of ready to use product

Preparation:

Ensure the surface the finish is being applied to is clean, and clear of any mould or mildew. This is important as Mould Defender will not kill mould present, however it will stop it from growing back.

Application:

Thoroughly stir paint, grout, mortar etc before adding Mould Defender.

Continue stirring the product while adding Mould Defender to ensure good dispersion and even viscosity.

- Note – Where mould is present, a suitable mould wash must be used prior to applying a finish dosed with Mould Defender

Protective Equipment: Wear Overalls, impervious gloves, apron, and full face shield.

Clean up & Storage:

Store in the closed original container in a cool dry place out of reach of children and pets away from direct sunlight. Toxic to aquatic life, dispose of empty container by wrapping in paper, placing in plastic bag and putting in garbage.

Flammability and Combustibility: Mould Defender is neither flammable nor combustible.

First Aid:

For advice contact a Poisons Information Centre (e.g. Australia 13 11 26, New Zealand 0800 764 766) or a doctor. If swallowed, do NOT induce vomiting. If in eyes, hold eyelids apart and flush the eye continuously with running water. Continue flushing until advised to stop by a Poison Information Centre, a doctor, or for at least 15 minutes. If skin or hair contact occurs, remove contaminated clothing and flush skin and hair with running water.
